“rights” means all rights, powers, privileges and immunities whether actual, contingent or prospective, whether observed or performed in Kenya or elsewhere.

2. On the appointed day, all the funds, assets and other property, both movable and immovable, which immediately before such day were vested in the former institutions shall, by virtue of this paragraph, vest in the Authority.
(2) On the appointed day, all rights, powers and liabilities, which immediately before such day were vested in, imposed on or enforceable against a former institution shall, by virtue of this paragraph, be vested in, imposed on or enforceable against the Authority.

(3) If, on the appointed day, any suit, appeal, arbitration or other proceedings of whatever nature and wheresoever instituted in relation to the business of the former institutions which is, by virtue of this paragraph, transferred to the Authority, shall not abate, be discontinued or be in any way prejudicially affected by reason of such transfer of the business of the former institutions or of anything contained in this Act, and any suit, appeal arbitration or other proceedings shall be continued, and enforced by or against the Authority.

MEMORANDUM OF OBJECTS AND REASONS

The objective of this Bill is to accelerate the growth and development of agriculture in general, enhance productivity and incomes of farmers and the rural population, improve investment climate and efficiency of agribusiness and develop agricultural crops as export crops that will augment the foreign exchange earnings of the country, through promotion of the production, processing, marketing, and distribution of crops in suitable areas of the country.

The Bill proposes to consolidate and repeal various statutes relating to crops in order to circumvent unnecessary regulatory bureaucracy in the crops subsector and reduce unnecessary regulation or overregulation of the crops subsector. The list of regulated crops (scheduled crops) has been expanded to cover all economically viable crops.

The proposed consolidation of the various legal and institutional frameworks would reduce duplication and overlap of functions among institutions involved in the regulation of crop agriculture, promote competitiveness in the crops subsector, attract and promote private investment in crop agriculture and to develop diversified crop products and market outlets. In order to facilitate development of scheduled crops, a Commodities Fund to be administered by the
Authority has been established. The reforms will also reduce unnecessary levies, taxes or other barriers to free movement of crop products and provide for a rationalized taxation system.

The Constitution of Kenya, 2010 designates distinct functions for the two levels of government. The proposed statutory framework seeks to implement the broader Constitutional principles relating to land use.

The Bill seeks to repeal the existing pieces of legislation which are disparate and uncoordinated and to give legislative anchorage to the policy measures outlined in the Agriculture Sector Development Strategy for 2010 to 2020 as well as Kenya's vision 2030. It also seeks to align the governance of agricultural sector to the Constitution of Kenya, 2010.

**Part I** Deals with preliminary issues. It provides for interpretation of terms as used in the Bill, objects and purpose as well as the guiding principles of the Bill.

**Part II** Identifies scheduled crops and makes provisions for their development including measures to increase productivity, access to domestic and overseas markets, provision of infrastructure and establishment and enforcement of standards in grading, sampling and packaging. A Commodities Fund to be administered by the Authority in accordance to guidelines to be approved by Parliament is established. This part also makes provisions for the identification of agricultural land. Under this part, the relevant State agencies shall ensure the provision of a broad range of incentives and facilities to support development of scheduled crops. These include credit assistance and guarantee, farm-inputs, extension service, infrastructural support including physical infrastructure development, financial and market information, fertilizer cost-reduction investment projects, pest and disease control, post harvest facilities and technologies including storage, processing, distribution and transport facilities. This part also provides for tax exemptions including tax breaks and duty waivers on the import of farm inputs and farm machinery.
**Part III** Deals with registration requirements for scheduled crops. The Authority is empowered to regulate scheduled crops with a view to promoting productivity, trade and access to markets. Such regulation will also cover aspects relating to facilitation of farm-inputs, provision if infrastructure, post-harvest services and technology and collection of farm products. Individual farmers will have the freedom to register with the respective growers associations and institutions for purposes of realizing economies of scale. Registration is intended to provide the necessary statistical information to facilitate the provision of a broad number of services contemplated under this Act.

**Part IV** Makes provision for licensing and taxation matters. This part implements the provisions of Article 209 of the Constitution with regard to taxation powers of the two levels of government as they relate to the crop subsector. It obliges the Authority to ensure that farm products are not subjected to double taxation at any stage in the two levels of government. This part also requires dealers and manufacturers of crops and crop products to be specifically registered and licensed. A person will only be issued with a license in accordance with the provisions of this part. It will be an offence to contravene these requirements.

**Part V** Provides for the appointment of county officers and crop inspectors. The inspectors will have the powers to enter, inspect and where necessary seize and crop or crop product illegally held. It is an offence to contravene the provisions of this Part.

**Part VI** deals with miscellaneous matters. These include dealing with crop diseases, imposition of levies, power to recommend establishment of subsidiaries and offences of a general nature. This part gives the Cabinet Secretary the power to make regulations on a number of areas to ensure smooth implementation of the Bill. It is under this Part that it is proposed to repeal the laws listed under the second schedule.

Under the savings and transitional provisions, it is provided that rules, orders, regulations, directions, notices, notifications or other administrative acts made under any repealed law, continue in force and have the like effect as if they were issued under this law. The
The Crops Bill, 2012

third schedule prescribes further transitional provisions with regard to assets, liabilities, contracts, legal obligations and staff of the former institutions.

The enactment of this Bill will occasion additional expenditure of public funds to be provided for in the estimates.

Dated the 10th September, 2012.

SALLY J. KOSGEI.
Minister for Agriculture.
