- (e) prescribing the manner and conduct of inspection and certification of lactation rooms as mother baby friendly; and
- (f) forms to be used in application for the flexible work arrangement.

MEMORANDUM OF OBJECTS AND REASONS

The principal object of this Bill is to provide a legal framework on mothers who may wish to breastfeed their children at the work place.

The Bill provides for the right of a mother to breastfeed freely or express milk for her infant. The Bill further requires employers to provide breastfeeding employees with lactation rooms to either breastfeed or express their milk for their children.

Breastfeeding is the first preventive health measure that can be given to a child at birth and it also enhances mother-infant relationship. It is nature's first immunization, enabling the infant to fight potential serious infection and it contains growth factors that enhance the maturation of an infant's organ systems.

Kenya is a signatory to treaties that provide for the right of an infant to exclusive breastfeeding for six months. The government should therefore promote and encourage breastfeeding and provide the specific measures that would present opportunities for working mothers to continue expressing their milk and breastfeeding their infant or young child. Furthermore, the practice of breastfeeding may save the country's valuable foreign exchange that may otherwise be used for milk importation.

Presently, female employees exit the work force or stop breastfeeding in order to secure their job security. No woman should be forced to compromise the health of her child in order to make a living.

PART I of the Bill provides for preliminary matters including the title of the Bill and the interpretation of terms used in the proposed Act.

PART II (Clauses 3-9) of the Bill provides for the fundamental principles and rights at work for a breastfeeding mother. It provides for the right to freely breast feed or express one's milk for the baby. It also places an obligation on the employers to provide breastfeeding working mothers with rooms to either breastfeed or express their milk. It also provides for the standards of such rooms. The Bill further provides for baby changing tables. This is important because the greater majority (public) finds it unsanitary to change a baby in a public setting such as a restaurant. This provision will also cater for persons who are travelling long distances in the accompaniment of babies, ensuring that in each public restroom a baby changing facility is provided.

This part also provides for the power of the Cabinet Secretary to make regulations for the better carrying out of the proposed Act.

This Bill is a Bill affecting counties and is an ordinary Bill.

The enactment of this Bill may occasion additional expenditure of public funds to be provided through the estimates.

Dated the 22nd March, 2017.

SABINA W. CHEGE,
Member of Parliament.
